Year 8 - Subject Standards Elaborations

		EXT	ADV	DEM	DEV	EME
		The folio of student work has the following characteristics: work has the following characteristics:				
Science Understanding	**Earth and space science**	● comparison and explanation of the processes of rock formation, including the timescales involve	● comparison and description of the processes of rock formation, including the timescales involved	● comparison of the processes of rock formation, including the timescales involved	● description of the processes of rock formation	● statements about the processes of rock formation
Science inquiry skills	**Processing and analysing data and information**	● following of conventions to construct accurate representations of data to reveal and analyse patterns and trends ● use of these patterns and trends when explaining relationships to justify conclusions	● following of conventions to construct representations of data to reveal and analyse patterns and trends ● use of these patterns and trends when describing relationships when justifying conclusions	● construction of representations of data to reveal and analyse patterns and trends ● use of these patterns and trends when justifying conclusions	● partial construction of representations of data to partially reveal patterns and trends ● drawing of conclusions	● partial construction of representations of data ● statements about data
	Evaluating	● evaluation of the quality of data to justify the explanation of how effective modifications to methods could improve the quality of their data ● application of scientific knowledge and investigation findings to critically evaluate claims made by others	● explanation of how effective modifications to methods could improve the quality of their data ● application of scientific knowledge and investigation findings to make informed evaluations of claims made by others	● explanation of how modifications to methods could improve the quality of their data ● application of scientific knowledge and investigation findings to evaluate claims made by others	● description of modifications to methods ● description of claims made by others	statements about: ● modifications ● claims
	Communicating	concise and coherent use of appropriate language and accurate representations to communicate science ideas, methods and findings in a range of text types	coherent use of appropriate language and accurate representations to communicate science ideas, methods and findings in a range of text types	use of appropriate language and representations to communicate science ideas, methods and findings in a range of text types	use of everyday language and representations to communicate science ideas, methods and findings	fragmented use of language and representations to communicate science ideas, methods and findings
